

MARCO VINICIO ALMENDAREZ BRIONES

JUNIOR SOFTWARE DEVELOPER | IT SPECIALIST

ABOUT ME

Results-driven IT candidate and Junior Software Developer with a solid foundation in object-oriented programming (Java, C++), relational databases (MySQL), and network topologies. Experienced in developing full desktop applications using MVC/DAO patterns and managing business operations. Seeking to contribute as a Junior Developer / IT Specialist to deliver scalable software solutions and maintain efficient system architectures.

EDUCATION

Universidad Politécnica de San Luis Potosí

Information Technology and Digital Innovation Engineering (August 2025 - Present)

CBTIS 131

Technical Degree in Programming (2022 - 2025)

LANGUAGES

English: B1+

Spanish: Native

EXPERIENCE & ACADEMIC PROJECTS

Operations & Logistics Manager

Purificadora "EL MANANTIAL" (Dec 2024 - Feb 2026)

- Managed daily operations, logistics routing for cargo transport, and customer service.
- Oversaw quality control, equipment maintenance, and route optimization.

Store Manager

Ferretería "El Cruz" (Feb 2021 - Aug 2023)

- Managed store operations, inventory control, and supplier relations independently.
- Handled merchandise reception, strict stock control, and direct customer advisory.

Industrial Predictive Maintenance IoT Dashboard

Python, Machine Learning (Scikit-Learn), Streamlit

- Engineered a predictive maintenance machine learning model using Python and Scikit-Learn (Random Forest) to analyze simulated industrial sensor telemetry and forecast equipment failure risks.
- Developed an interactive real-time dashboard with Streamlit and Plotly to visualize historical degradation patterns and monitor live operational health parameters.

StockFlow – Inventory Management System

Java, MySQL, MVC Architecture

- Engineered a complete desktop inventory system using Java, MySQL, and MVC/DAO design patterns for secure data handling and supply chain tracking.
- Created dynamic search filters, secure CRUD operations, and role-based access control for administrators.

Industrial IT/OT Network Topology & Security

Cisco Packet Tracer

- Designed a secure plant network architecture using Cisco Packet Tracer, successfully segregating IT/OT traffic and implementing ACLs to protect critical manufacturing machinery assets.
- Configured Access Control Lists (ACLs) to explicitly block unauthorized traffic into the assembly line network, protecting industrial machinery assets.

SKILLS AND KNOWLEDGE

- **Programming languages:** Java, Python, C, C++, HTML, CSS, JavaScript
- **Database:** MySQL, Access
- **Software and technologies:** XAMPP, Apache NetBeans, Cisco Packet Tracer, Git/GitHub, Microsoft Office, Visual Studio, Unreal Engine 4, Blender, Arduino, Linux.
- **Courses and certifications:** Data Science Essentials with Python, CCNA: Introduction to Networks, Fortinet Certified Associate Cybersecurity, Introduction to Modern AI, Linux Essentials.
